

# Medicaid Maternity Outcomes

# Birth Weight, Delivery Costs, & Delivery Mode

Relationship Between Birth Weight, Mode and Total Cost

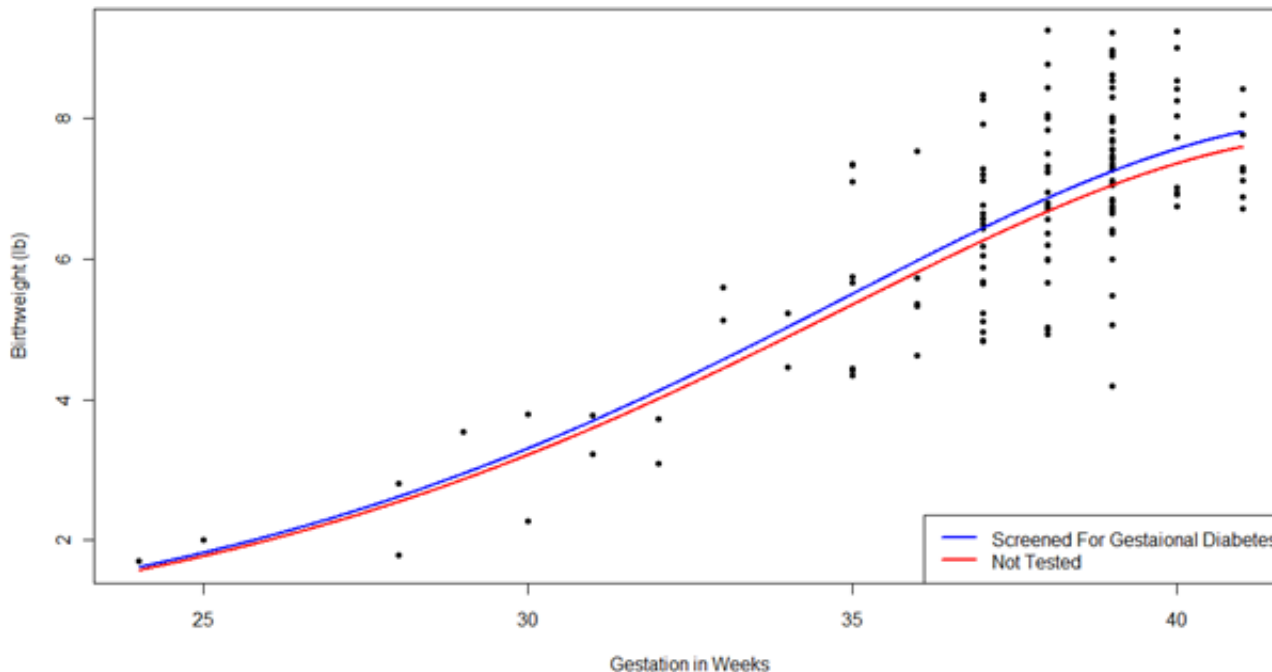

- There's no relationship between delivery mode and baby birth weight
- Delivery costs increase as birth weight decreases

\*Birth costs include pregnancy and delivery only

# Impact of Process Measure on Outcomes

Impact of Health Care Quality Measures on the Relationship Between Gestation Time and Birthweight

Delivery outcomes, defined as baby birth weight and weeks of gestation, are not any different for women screened for gestational diabetes compared to those who were not.
